BRAIDED PIPES

SFMC, In Touch with Tomorrow...

An ISO 9001 : 2000 Certified Company

PVC braided hoses also known as car washing pipes have wide applications in industrial use and are used as domestic garden hoses.

Industrial applications of PVC braided hoses includes:

- High pressure spray hose
 - Air compressor hose and Cycle pump hose
 - Chemical transfer hose
 - Testing and machinery equipments
 - Railway coaches water supply
 - Fire extinguisher hose
 - Automobile components
 - Agricultural equipments like pesticide spray hose
- PVC braided hoses and PVC welding hoses can be manufactured in 2-ply (two ply), 3-ply (three ply) and 4-ply (four ply). All our braiding pipes have anti-kink property. All sizes and colours are available in PVC braided hoses; Inner Diameter starting from 5 mm and outer diameter going upto 50 mm. Tailor made sizes are welcome.
- **Air/ Pneumatic Pipes** are ideal for compressed air application & conveying chemicals and gases.
 - **Rock Drilling Pipes** are used in marble, granite mining & tractor Mounted Compressors
 - **Car Wash Pipes** can be used in service station with a working pressure of 30/40 kg/cm, they are oil resistant & abrasion resistant.
 - **Super Spray Pipes** are ideal for spraying pesticides, insecticides & weeding pesticides etc.
 - **Welding Pipes** are ideal for oxy-acetylene welding purpose & cutting equipment in all types of industrial workshop, Ship building, Service station etc.
 - **PVC Garden/ Water Pipes** are suitable for all water delivery purpose like gardening, construction & irrigation.
